Profssor Vance Stevens	Online Language Learning and Teaching
Dr. Imouri El Mustapha	Ask the Experts: Doctoral students' Challenges
Student-Led Webinar	Closing Ceremony: Students Experiences & Takeaways
Dr. El Kirat	Preparing for the Defense

2- The guiding question suggested by Professor El Kirat and the attendees

- What is your general assessment of your experience with the training program?
- To what extent has the training program reached its objectives?
- What are your main takeaways from your experience with this online training?
- How is this experience important to your research?
- How have the webinar series motivated you to progress in your work and improve your doctoral research?
- How has the experience as a whole changed your perceptions about your research and your doctoral journey?
- What are your future needs? Any recommendations?
- What was the situation with your research before the confinement? Including how you felt as well.
- What stages were you at before and after the webinar series? How were you able to overcome the challenges associated with the COVID situation?
- How did you exploit the offered research databases during confinement?

- How did you learn about the program? What was the added value for the webinars you attended? (technically, practically, psychologically...)
- What are your main motivations? (personal context)
- For future takeaways: What are 'non-academic' takeaways/skills you picked up from the webinar series?
